Creating the API

Shawn Wildermuth

MICROSOFT MVP, AUTHOR AND SPEAKER

@shawnwildermuth wildermuth.com

This Module

Build an API controller

Use Verbs for different actions

Validation in APIs

Using ViewModel mapping

Create Association controllers

Use QueryStrings in APIs

Demo

Create an API Controller

Using Query Strings for APIs

Going Deeper

Web API Design

- pluralsight.com/courses/web-api-design

Implementing an API w/ASP.NET Core

- pluralsight.com/courses/aspdotnetcore-implementing-securing-api

What We've Learned

API and View Controllers are the same

Mapping URIs is simpler at the Controller

You're working with status codes in an API

REST verbs is how you differentiate actions
